Exhibit A Statement of CPNI Procedures and Compliance

G-Link Communications, Inc. Statement of CPNI Procedures and Compliance

G-Link Communications, Inc. ("G-Link" or "the Company") is strictly a wholesale provider of telecommunications services, and as such does not have any subscribed service relationship with any business or residential end use customers. As a wholesale provider, the Company does not use or permit access to the CPNI of its downstream carriers to market any telecommunications or non-telecommunications services and has trained its personnel not to use CPNI for marketing purposes. Moreover, the Company does not market any services to end users.

G-Link is committed to protecting the confidentiality of all customer information, and has processes to safeguard its customers' CPNI from improper use or disclosure by employees; and to discover and protect against attempts by third parties to gain unauthorized access to customer CPNI.

The Company does not disclose CPNI over the telephone or online. G-Link does not sell retail services, and therefore has no retail store locations.

The Company understands its obligation to notify law enforcement in the event of a breach of customers' CPNI and to ensure that customers are not notified of the breach before the time period set forth in the FCC's rules, or, if applicable, when so authorized by law enforcement. While the Company does not have access to end user CPNI, including call detail information, in the event there is a breach with respect to any CPNI related to its downstream carriers, the Company has procedures in place to notify law enforcement of the breach. Although there have been no breaches to report to date, the Company has a process in place to maintain records of any breaches discovered and notifications made to the USSS and the FBI, and to customers.

G-Link has not taken any actions against data brokers in the last year.

G-Link did not receive any complaints about the unauthorized release of CPNI or the unauthorized disclosure of CPNI in calendar year 2007.

G-Link has not developed any information with respect to the processes pretexters are using to attempt to access CPNI.
